

COUNTRY PROFILE ARMENIA

Opportunities for German business – Detailed report on waste and water management in Armenia published

Armenia is undertaking steps to modernise its waste and water sectors and adopt international best practices. The Comprehensive and Enhanced Partnership Agreement with the European Union (CEPA) requires Armenia to transpose a number of important EU environmental protection directives into national law. In addition, the Solid Waste Strategy 2017 – 2035 sets out measures to upgrade and modernise the country's waste management practices. These regulatory developments open up significant business opportunities for German companies offering consulting, engineering and construction services. There are also opportunities for equipment suppliers and companies offering training in the waste and water sectors.

The comprehensive report on the Armenian waste and water sectors, which was prepared by **ANDREAS VON SCHOENBERG CONSULTING** and Sachsen Wasser GmbH, is an important information tool for SMEs considering entering the Armenian market. The report includes general information on the country's economic and political development as well as tips for doing business in Armenia. In addition, detailed market and technical information is given in the chapters on the waste and water sectors.

The country profile is available in German under the following link:
